Financial
Experience.

COINSURGE INVESTMENT PLANS & BENEFITS

We earn money with price drop and rise for crypto currency. However, this kind of activity is very risky. Most investors don't have enough information and knowledge, so they often lose their capital when trading crypto currency on stocks.

PROBLEM OVERVIEW

Cryptocurrencies have the potential to positively impact the way we use the money and to solve many problems faced by developing countries such as financial exclusion, hyper-inflation and countries default.

Since anyone with an internet connection can instantly access it they provide us an alternative to the current financial system bringing the benefit of the accountability and transparency of the Blockchain technology, with less expensive and faster transaction.

Inflation

in developing countries such as Venezuela, life's a struggle as inflation heads for one million percent.

2B people

in the world without any access or ability to obtain a bank account or manage their money.

DESPITE ALL THE BENEFITS, CRYPTOCURRENCIES HAVE NOT BEEN WIDELY ADOPTED. WHY?

VOLATILITY

One of the big problems is the volatility of the cryptocurrencies that are currently on the market. The merchant cannot take the risk of engaging in a sale, only to see how the value of that sale plummets the next day.

Volatility has also been a serious concern especially for investors who would like to invest in projects that bring value and are not shaken by market sentiment.

COMPLEXITY

On the other hand, the cryptocurrencies tools are complicated to use for those who are not tech savvy, extra and complicated software should be used to accept crypto payments, and it is difficult to exchange crypto-asset to fiat money.

THEN WHAT IS COINSURGE MISSION ?

The COINSURGE Mission is to create a peaceful and retirement earning avenue were members can invest with peace of mind, bringing a completely smarter financial service to everybody regardless of age or Net worth.

COINSURGE Focuses Majorly on Forex Trading, Crypto Currency Trading and Crypto Mining, Helping investors from all round the world secure profit on any investment of their choice. Currently a total sum of 824 expert traders are in it's network constantly trading real-time. The secret of success of the economic achievements lies in the constructing a model of society, the country's small business is the engine, which invents and markets daily its know-how products in the global market. The shares of such companies are constantly increasing in value, so the Tokyo Stock Exchange is one of the largest in the world, and 80% of the shares that are bought and sold in Japan are traded on it.

COINSURGE is an investment company officially registered on the NewYork Stock Exchange. The priority direction of COINSURGE is the investment in securities of small enterprises in USA. Forex, also known as foreign exchange or FX trading, is the conversion of one currency into another. It is one of the most actively traded markets in the world, with an average daily trading volume of \$5 trillion. Forex, or foreign exchange, can be explained as a network of buyers and sellers, who transfer currency between each other at an agreed price. It is the means by which individuals, companies and central banks convert one currency into another.

Following the trends of change in the market of one of the largest stock markets of the world, the company COINSURGE has come out with a proposal to expand the range of investors and to make available the opportunity to purchase shares of American companies for everyone from different parts of the world.

Crypto trading, or cryptocurrency trading, is simply the exchange of cryptocurrencies. Like in Forex, you can also buy and sell a cryptocurrency for another, like Bitcoin or altcoin for USD and Euro. This is one way of getting involved in the world of cryptocurrencies without having to mine it.

Crypto Mining

Mining is the process of validating other people's transactions with a computer and then adding them to the long, public list of all transactions known as the blockchain. In exchange, people get rewarded with cryptocurrency.

Anyone with a computer and an internet connection can become a miner. But before you get excited, it's worth noting that mining is not always profitable. Depending on several factors, such as which cryptocurrency you're mining, how fast your computer is, and the cost of electricity in your area, you may end up spending more on mining than you earn back in cryptocurrency.

Are Investors Funds Secured ?

Your funds are secure in top Australia banks, not offshore. COINSURGE is regulated and transparent and gives individual investors like you a level playing field.
